
EZ Note

Take Notes With Ease.

EzNote is more than just a place to jot things down—it's a smarter way to take notes. Whether you're speaking a grocerylist into the app, uploading handwritten pages, typing out a concept, or importing documents, this note-taking app adapts to your style and turns your content into beautifully organized, intelligently designed notes.

No formatting stress.
Just your ideas, polished and ready to use.

EzNote doesn't just design notes for you, it leaves room for your creative side as well. With the option to design your own notes and make custom templates, your can tailor your content to the finest level of detail.

Welcome

This screen appears after the load screen. It welcomes the user and provides a breif message about tailoring the app to their notes style.

View Animation

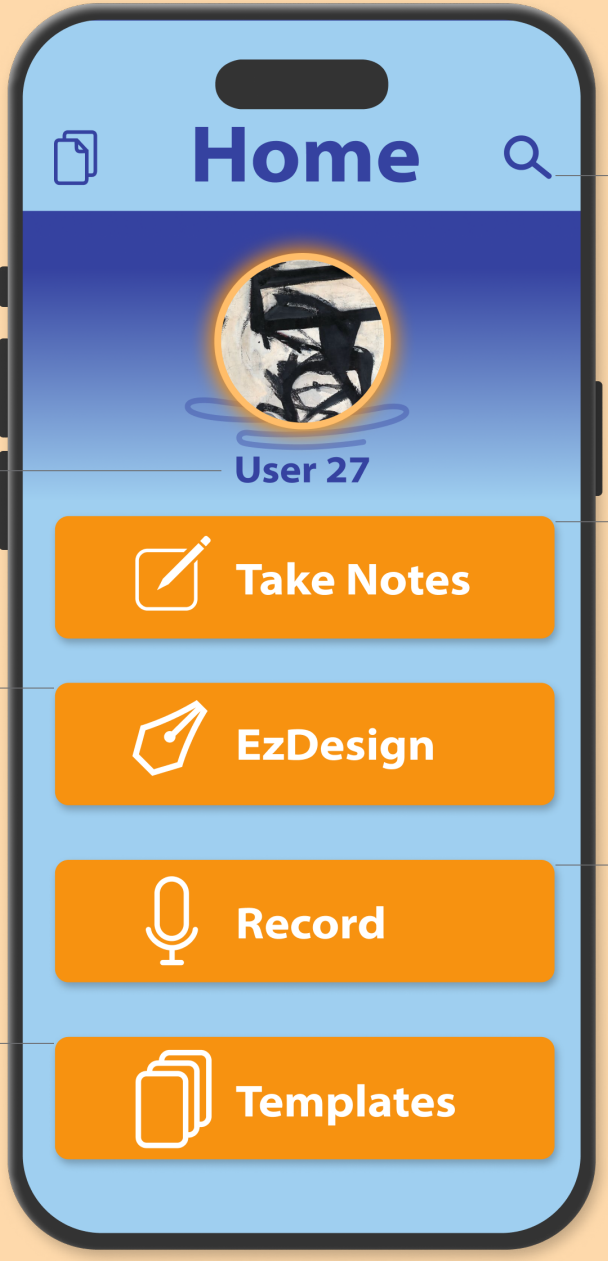

The "what's your style?" button takes the user to a questionnaire to get to know the individuals' intrests and their learning style so that the EzDesign feature of the app can generate note layouts that resonate with the user.

User can skip questionnaire and customize the app later through their profile.

Home

The Home page displays all of the main functions of the app for easy access. This makes it convenient for the user to open the app and get straight to the task in mind.

Top bar allows the user to quicky type file name or click on the files icon on the left to browse all files

Tap on profile to access user information

User can take and design their own notes. Opens a blank canvas with all the tools for their note taking needs.

Opens EzDesign function to select note imput and generates a well designed verison of the users notes.

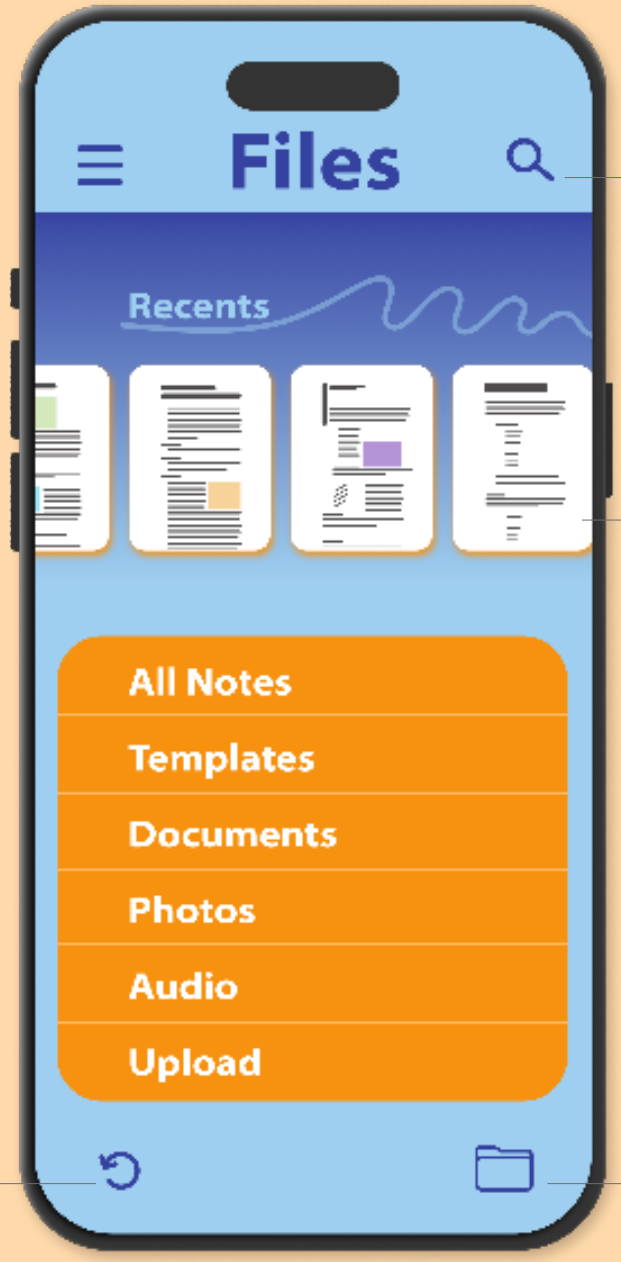

User can click the record button to speak thier notes into the app.

The templates button provides the option to select a template before imputing notes.

Files

Shows the most recent notes the user has taken and provides several options to narrow the users search for files.

View Animation

Quickly search for file

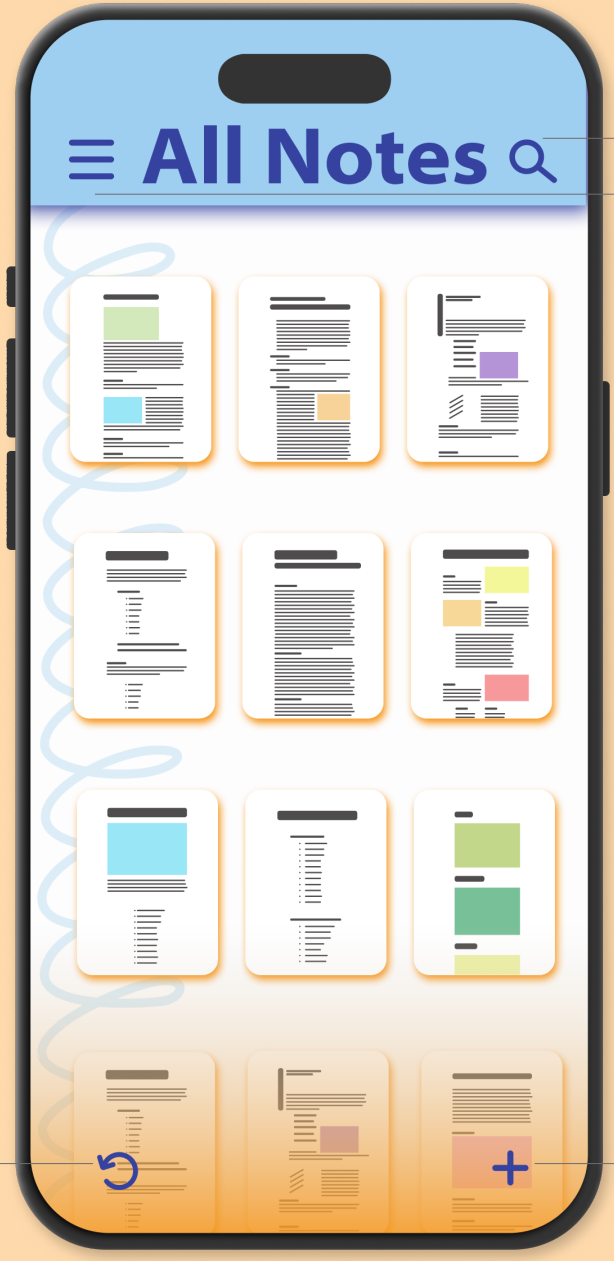

View your most recent EzNote files

Back to Home

Access folders

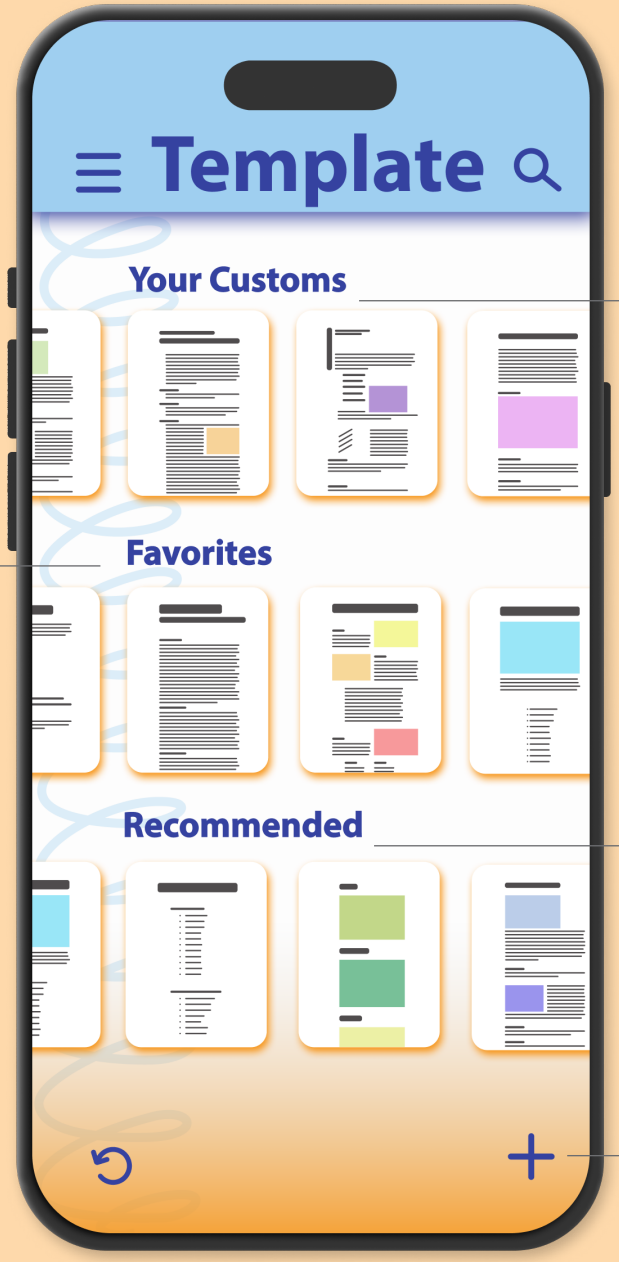

All Notes

Shows all of the users EzDesign files that were taken in the app.

Templates

The templates section lets the user select a template before they imput their notes. This section lets the user have more control and have a more predictable experience.

Swipe to horizontally scroll through custom templates that the user designed themselves.

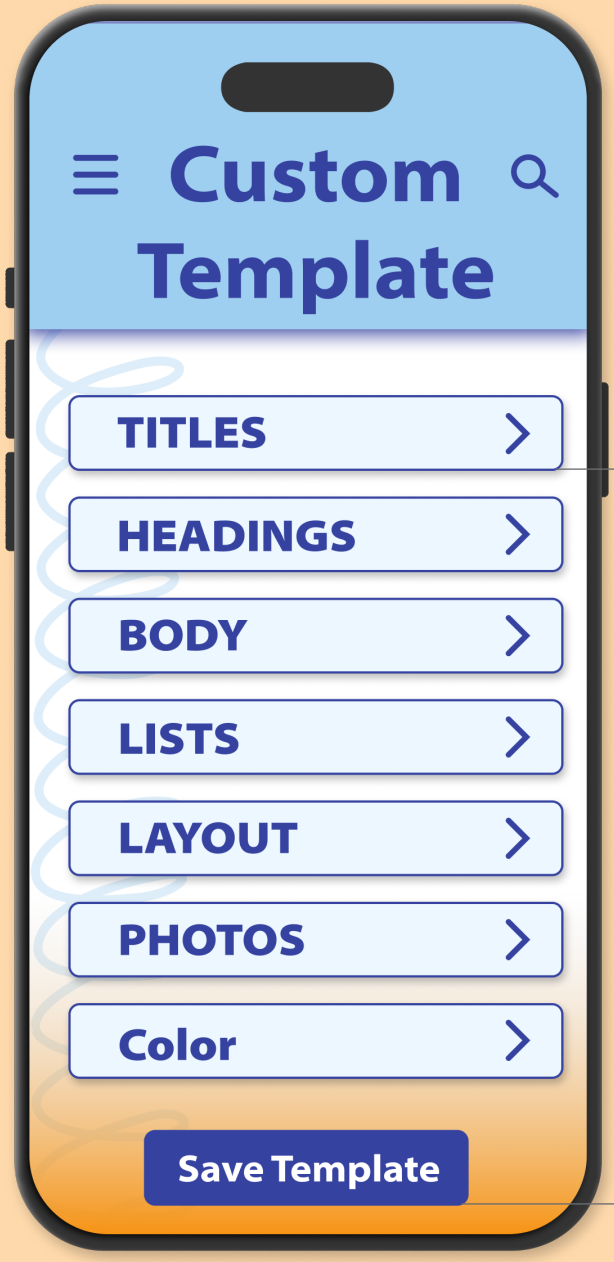

When in a template the user can navigate to the menu to add it to their favorites so that they can easily browse their favorite templates in a horizontal scroll.

EzNotes provides pregenerated templates based on the users learning style and intrests.

Create new template

Make Template

Make a custom template that you can import your notes into to get the exact result you are looking for. This section displays all of the essential design properties. With the custon template function you can be in full control of the design process without the taking time to design it yourself.

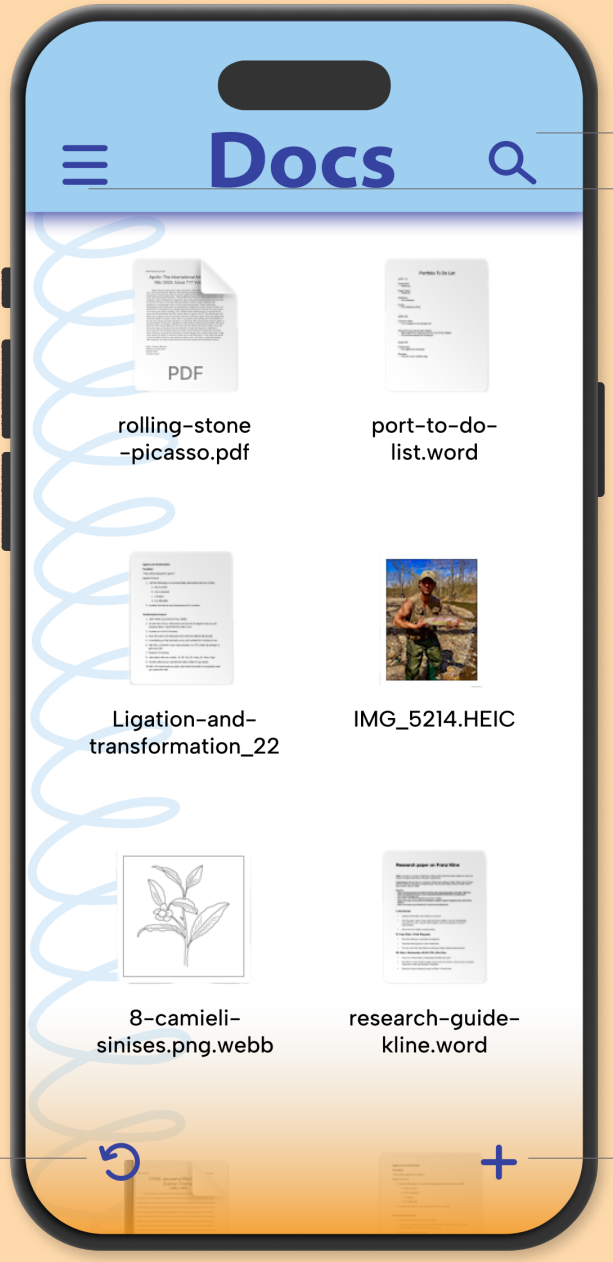

These pannels expand to show properties such as type characteristics, layout options, photos, and colors.

Once you have specified the template properties click here to name and save your custom template.

Documents

Various document formats can be saved through the app so that they can be accessed easily by the user.

Quickly search for notes

Subtract form toolbar

Back to Take Notes page

EzDesign

EzDesign takes various note imputs and designs the users notes based off of their learning styles and intrests.

View Animation

Opens a camera to take a picture of hand written notes or the user can navigate to their cammera roll to upload pictures that have been previously taken.

The upload button opens your files so that you can drop any document into the app to be designed.

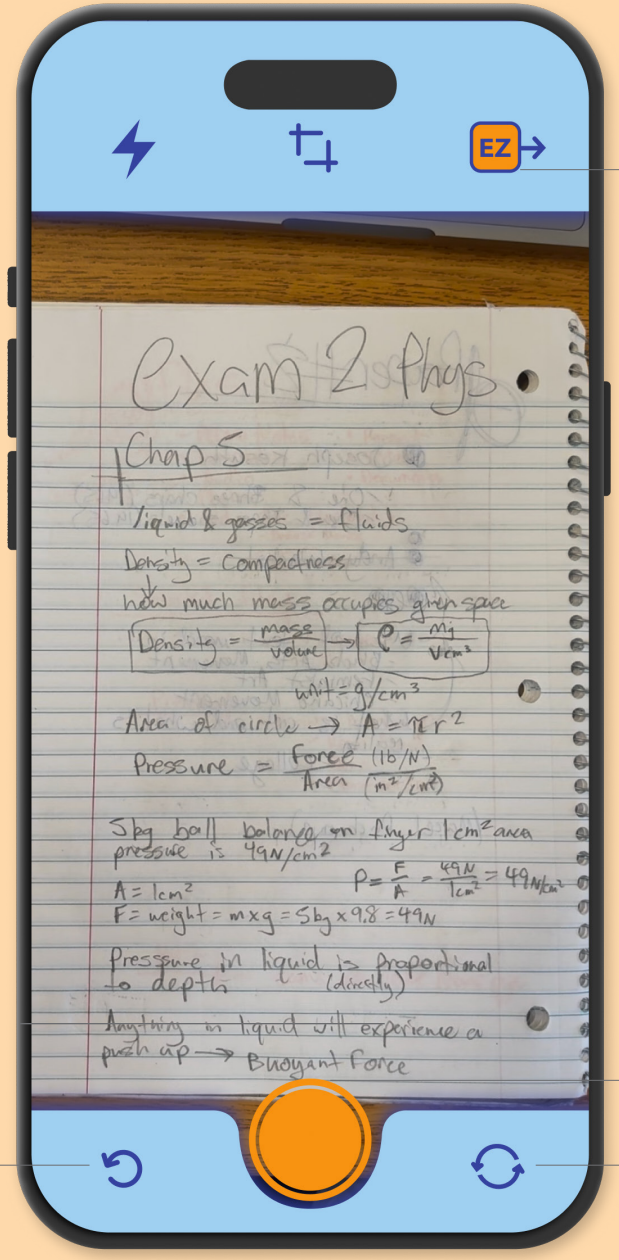

If the user doesn't have the time to type or simply doesn't feel like typing they can speak their notes into the app to be designed.

With the type section the user can type their notes and the app will design the content as they type.

Back to home

Camera

The camera funtion allows the user to take photos of written and typed notes to be EzDesigned as well as save photos in the app for later use.

Once you capture your photo press the EZ button to generate a layout

Crop your photos with the center icon

Turn flash on and off with the left icon

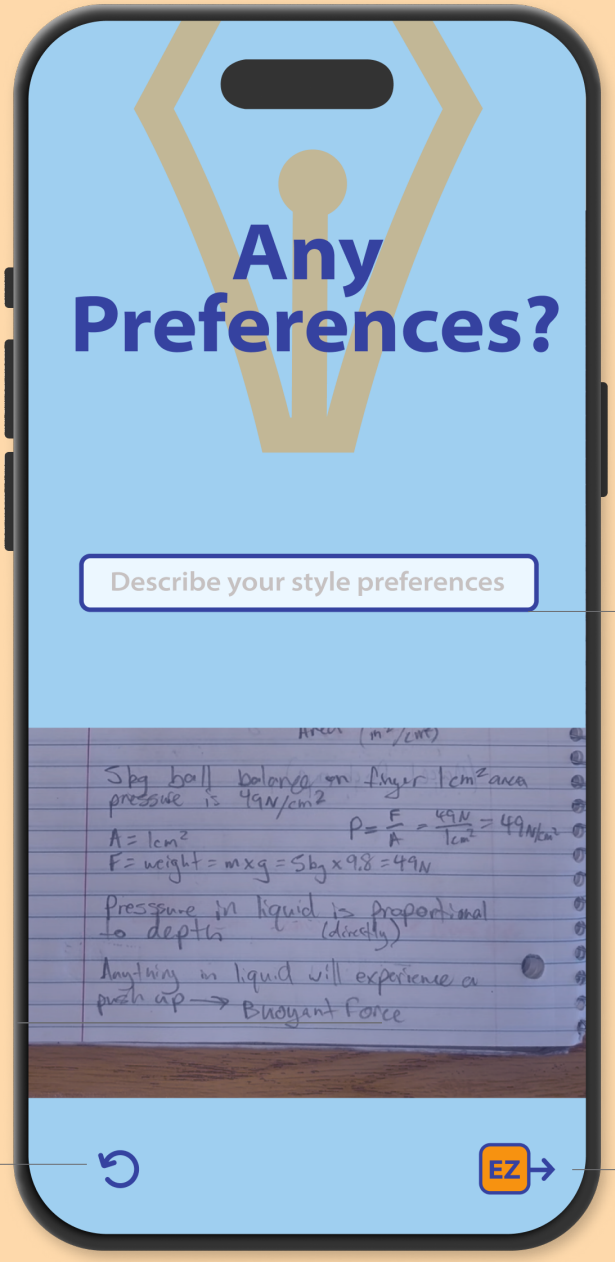

Shutter button, click to capture photo.

Back to home

Reverse the camera view

Preferences

Before EzNote brings your content to life, this screen lets you guide how it should look and feel. From breif to complex suggestions this function ensures that EzNote generates notes that are tailored to your unique style and purpose.

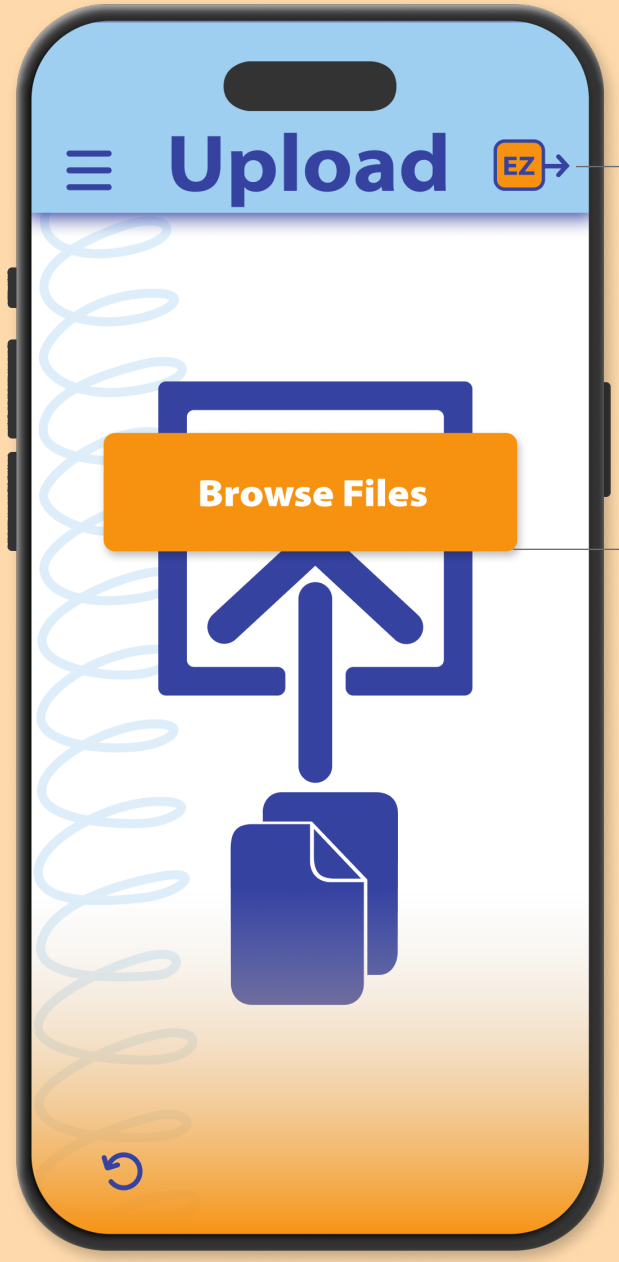

Imput your suggestions here. Keypad appears when feild is selected.

Back to home

Generate and continue to your EzDesigned notes

Upload

Upload your documents in any format to be EzDesigned.

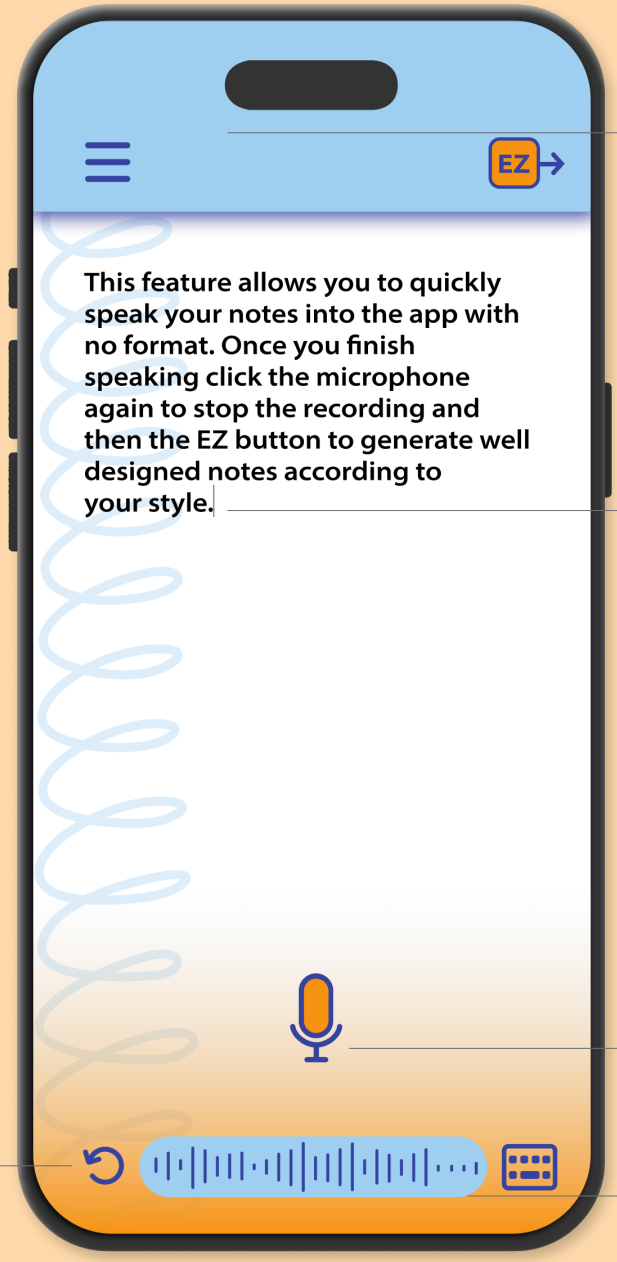

Once your document is uploaded select the EZ button to proceed to EzDesign.

Browse your files to upload a document to be EzDesigned

Record

The record section accessed through the home page lets the user speak their notes into the app if they are in a rush and need to take note of anything in their daily life or simply dont feel like typing.

Menu Contents

- Home
- File
- Edit
- Playback
- Audio settings
- Help

Types as you speak.

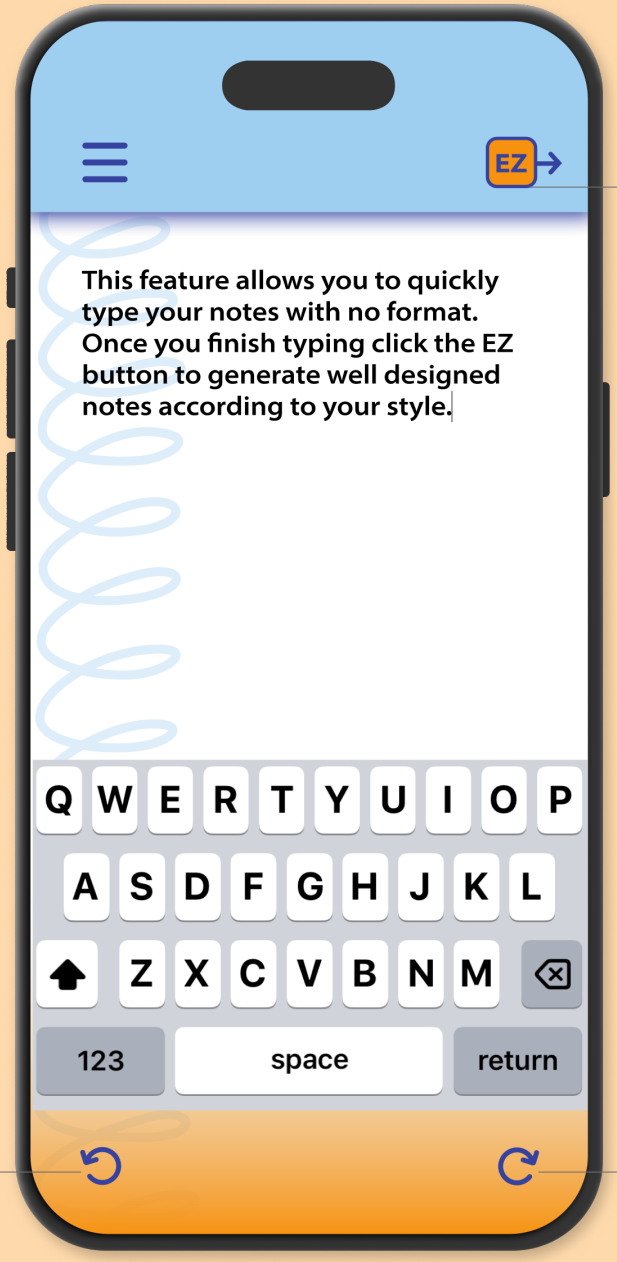

Select the microphone to start speaking notes into the app. Click again to stop/pause recording.

Lets the user know the noise levels. If levels are spiking, particularly in loud public areas, user may need to move phone closer to mouth.

Undo and Redo buttons

Type

EzNote provides the option to type freely without worrying about the layout. Type your thoughts and ideas in any way you like and EzNote will design it for you.

Once you finish typing click the EZ button to generate the design.
