

EzNote

Take & Design your notes with ease.

EzNote is more than just a place to jot things down—it's a smarter way to take notes. Whether you're speaking a grocery list into the app, uploading handwritten pages, typing out a concept, or importing documents, this note-taking app adapts to your style and turns your content into beautifully organized, intelligently designed notes.

No formatting stress.

Just your ideas, polished and ready to use.

EzNote doesn't just design notes for you, it leaves room for your creative side as well. With the option to design your own notes and make custom templates, you can tailor your content to the finest level of detail.

Goals

Develop note taking app unlike other existing applications.

Highly Customizable

Fun & Easy to use

Cater to a diverse range of users

Give the user full design control within an application that is able to design with minimal user input.

Challenges & Solutions

Allowing the user to personalize the app.

After the welcome page the EzNote prompts a "What's your style?" page to get to know the users style preferences so the app can generate notes tailored to the users interests and style. The homepage displays a profile icon that provides many customization options when opened.

Making the app fun and easy to use.

Soft shades of orange and blue make the app feel light and exciting paired with fun and stylized design animated in a snappy manner get the user exited to use the app. The home page provides a clear and bold menu displaying the apps main functions at the center of attention directing the user to a page that best suits their immediate note taking wants and needs.

Catering to a diverse range of users

EzNote accepts a wide range of file formats as well as multiple ways of uploading them. This allows all types of users to upload preexisting notes no matter the format. Once the files are uploaded the user can choose to design the notes in their own way or have the app generate a layout for them.

Full control within an application that is able to design on its own with minimal user input.

The user is able to input their notes through photo, file, upload, and type or speak their notes into the app. once the notes are uploaded into the app the user can control the app to varying degrees. The EzDesign option generates design notes on its own based on the users style preferences with a suggestions prompt to guide loose design preferences. The user can upload their notes into pre-made design templates or a template they made themselves. The app also has a fully build design function that allows the user to type and design their own notes within the app with full design control.
